As of March 2023 LTM

HIGHLIGHTS

Arauco generates renewable energy from forestry biomass and uses it in the production processes.

In Chile, Argentina and Uruguay, we are self-sufficient in net electricity consumption and we sell the surplus to the local grid.

5 cogeneration plants in Chile and 1 plant in Uruguay are registered under the Kyoto Protocol Clean Development Mechanism (CDM).

We expect MAPA will generate an additional surplus of 142MW available for the national grid.

line 3 | MAPA

The investment for this project was approximately

US\$2.9 billion

The project considered the shut down of Arauco's line 1 of 290 th. tonnes of short fiber pulp (done on January 3rd 2022), and the construction of a cogeneration plant that we expect will generate a surplus of **142 MW** available for the national grid.

The background of the right-hand page is a photograph of the interior of the Arauco Mill (MAPA). It shows a large, modern industrial space with a high ceiling, glass railings, and workers in safety vests. A large, stylized logo is overlaid on the image. The logo is composed of three interlocking loops in teal, yellow, and red colors.

Modernization and Expansion of the Arauco Mill (MAPA) consisted in the construction of a third pulp line of 1.56 million tonnes of short fiber production capacity.

On December 29th, 2022, MAPA started feeding chips to the digester of Line 3, initiating its ramp-up and process of pulp production. As a result, Line 3 produced its first bale on January 20th, 2023, expected to reach its full capacity in the short-term.

A vertical banner on the left side of the page. The top half is teal with white text, and the bottom half is purple with a white icon of a hard hat and a cogeneration plant. The text reads: "MAPA NEW PULP LINE & COGENERATION PLANT AT ARAUCO MILL".

INTEGRATED REPORT 2022

IN APRIL, WE
PUBLISHED OUR INTEGRATED
REPORT, AVAILABLE IN ENGLISH
AND SPANISH.

SUSTAINABILITY
STRATEGY

Deloitte officially validated our carbon neutrality in 2020 for 2018, in 2021 for 2019 and in 2022 for 2020 (Method applied in accordance with the Deloitte Neutrality Protocol guidelines).

Price Waterhouse Coopers audited the entire estimation process of captures and storage in forestry products.

ARAUCO was the first company to successfully apply this protocol.

**ARAUCO
AT THE
COP 27**

**BECOMING
NATURE
NET**

POSITIVE!

Arauco is initiating an ambitious plan to measure the natural capital related to our operation, to become **NATURE NET POSITIVE**. Our approach on this matter is based on three key dimensions:

**1
WATER
MANAGEMENT**

**2
BIODIVERSITY
CONSERVATION**

**3
CO₂ ATMOSPHERE
REDUCTION**

TAKEAWAYS

WE HAVE BEEN FACING A CHALLENGING PERIOD, AFFECTED SPECIALLY BY THE LAST FOREST FIRE SEASON, ARAUCO'S LINE 3 RAMP UP, MILL STOPPAGES AND MARKET VOLATILITY.

WE CONTINUE TO EXPAND GLOBALLY, SEEKING NEW CHALLENGES TO MAXIMIZE THE COMPANY'S VALUE IN A SOCIAL, ENVIRONMENTAL, AND ECONOMICAL RESPONSIBLE WAY.

AS A GLOBAL COMPANY WE STRIVE TO CONTINUE AS PIONEERS IN SUSTAINABILITY.
