3Q 2024

- During the third quarter, we saw a more deteriorated market, mainly affected by a decrease in demand, an increase in supply due to new capacities and an increase in global inventories.
- In **China**, the pulp market remained cautious, as paper producers maintained low inventories and continued with pressured margins due to overcapacity. Hardwood supply increased as new mills in Brazil and China began operations, pushing prices down for short fiber throughout the quarter, while long fiber prices stabilized after an initial decline.
- In **Europe**, the market was weaker than in the second quarter, with reduced demand from the paper industry and mill closures for maintenance. The tissue demand remained stable. Short fiber prices declined, and due to market instability, costumers decreased their purchase volume, offset by spot sales.
- The **textile pulp** market remained stable following the trend seen in the second quarter. The viscose market remained with low inventories, and with stable operating rates.
- Production during the third quarter of 2024 was slightly higher than production in the same period of 2023, mainly due to the scheduled stoppage of the Valdivia mill that was stopped from April 2023 to August 2023

PULP OUTLOOK

REVIEW BY BUSINESS SEGMENT & OUTLOOK

For the fourth quarter of 2024,

- We expect the Chinese market to recover compared to the third quarter in terms of pulp consumption as economic measures announced by the government could improve country's economy and increase paper demand.
- Europe is expected to continue the tendency of the third quarter, with end users being more cautious especially, in the Printing and Writing and Specialty segments.
- Pulp supply should increase during the quarter as ramp up of new mills are increasing pulp availability in the markets.

WOOD PRODUCTS / OUTLOOK

53%

North America

MDF:

- We expect a challenging scenario in the short term as the market has some oversupply as new mills are ramping up, however, positive trend for 2025.

PB:

- Market remains strong, with continued price increases and mills operating at 100%, as capacity have been coming out the last two years. Outlook regarding demand is stable.

REMANUFACTURED PRODUCTS:

- We expect a balanced supply and have continued to push price increases due to an increase in supply chain costs. In boards, we see a more challenging scenario in the short term, as Asia and South America are being more competitive.

PLYWOOD:

- Market continuing last quarter’s positive trend, with steady volumes and pricing.

BRAZIL:

- We expect a steady market, with volumes and price stability.

CHILE:

- Uncertainty remains as we haven't seen an improvement in the Construction Sector.

ARGENTINA:

- Some pressure on costs, but with a better scenario with a slow recovery in margins and sales.

Asia,
Oceania,
Europe and
Middle East

ASIA:

- Challenging outlook, with slow demand expected to continue as there are high stock levels in some markets and increased supply impacting the rest of 2024. We expect a more stable outlook for 2025.

OCEANIA:

- We expect a stable market for the rest of the year.

EUROPE:

- We expect improvement, with announcements of local mills closures from some competitors.

MIDDLE EAST:

- Challenging outlook toward year-end with slow markets due to low-cost European supply.
